

Sustainable growth at the chemical park GENDORF

ELECTRICITY, NATURAL GAS, AND UTILITIES SUPPLY

Ethylene pipeline

We provide a highly available supply of ethylene for the GENDORF Chemical Park.

With the connection to the ethylene pipeline, the competitiveness of the ChemDelta Bavaria and the highly available supply of ethylene to the GENDORF Chemical Park will be strengthened. The ethylene pipeline runs from Münchsmünster to Gendorf and on another route from Gendorf to Burghausen.

- Total length Münchsmünster - Gendorf 112 km, diameter 10 inches
- Total length Burghausen - Gendorf 8 km, diameter 12 inches
- Throughput capacity: 380,000 t/a ethylene

The pipeline is monitored and maintained around the clock by InfraServ Gendorf from the GENDORF Chemical Park.

Local residents are requested to contact InfraServ Gendorf in advance in case of construction projects on the plots concerning the route.
