PREDICTIVE MAINTENANCE

Condition monitoring

Condition monitoring gives you information about the condition of your plants and machinery at a glance, therefore creating the basis for condition-based maintenance and Industry 4.0.

We support you during the planning and specification phase of condition monitoring systems for plant monitoring and with the diagnosis of data from condition monitoring systems to assess plant and machinery condition.

Our services:

- Manufacturer-independent consulting regarding condition monitoring systems
- Feasibility studies and system comparisons
- Plan and specify condition monitoring systems for plant monitoring
- Integrate metrology locations into existing systems
- Upgrades and retrofits of existing systems
- Diagnostics on metrology readings for assessing machinery and plant condition
- Conduct online and off-line measurements on machinery
- Thermal imaging on process engineering and electrical plants
