

Sustainable growth at the chemical park GENDORF

DISPOSAL

Disposal management

As a site customer at the chemical park GENDORF, you will need reliable disposal of your waste – regardless of whether small or large volumes of waste are involved.

As a certified waste disposal contractor and operator of the chemical park GENDORF – which generates a substantial variety of waste – we are familiar with the correct disposal channels. We can dispose of a substantial portion of the waste in our own plants. If this is not possible, our disposal management experts will show you suitable alternatives, and will support you with the implementation or take care of the entire disposal on your behalf.

Our services:

- Consult on waste disposal and determine the correct and most cost-effective disposal channel
- Research the most effective disposal plants for the customer
- Disposal in compliance with industry practices
- Prepare records required by waste law
