SECURE BUILDINGS AND PROPERTIES

Project management and project implementation of IT building security installations

You are looking for a competent partner for project managing the installation and service of IT building security.

In consultation with you and all other trades, we assist you starting with consultation and concept development, continuing to project planning, and finishing with the installation of your technical security installations. We also take care of legally compliant service and maintenance to ensure functional reliability.

Our services:

- Customized consulting for your IT building security
- Prepare fire alarm notification concepts
- Functional project management for technical security installations based on deliverable phases
- Coordinate and control projects related to IT building security
- Prepare planning documentation for the various deliverable phases
- Install, assemble, and commission technical security installations
- Services from inspection to maintenance of technical security installations
- Operate technical security installations as a managed service
