

CONSTRUCTION MANAGEMENT

Safety coordination – construction site including safety audits/construction site inspections

Our experts are responsible for coordinating the safety of work performed by various trades in order to avoid interference hazards.

Various trades interact at industrial construction sites, typically under considerable schedule pressure. The work environment presents a wide range of potential hazards that are also constantly changing. People with greatly differing prior experience and training levels with respect occupational safety move about in the hazard zone. Our safety coordinators permanently monitor the situation to guarantee that all safety standards and regulations are effectively implemented at the construction site. This is an essential building block for smoothly processing an industrial construction project.

Our services:

- Coordinate the work with participating contractors/trades
- Safety coordination iaw. DGUV V1 Section 6
- Consulting for the safe completion of work done in parallel
- Regular construction site inspections with appropriate frequency and written transcript
- Participant briefing following analysis of the inspection
