

Forward-looking environmental services & analytics

MEASUREMENT, TESTING, AND MONITORING OF ENVIRONMENTAL REQUIREMENTS

Environmental lab

Our environmental experts give you access to an extensive range of services that allow you to demonstrate compliance with your regulatory requirements – ranging from water and wastewater analytics, air/gas sample analytics, to soil and contaminant load studies and waste studies.

InfraServ GENDORF operates an environmental lab that also conducts special purpose tests, such as Zahn-Wellens tests and decomposition inhibitor tests. Take advantage of our experience and expertise – rely on the services of the certified environmental lab operated by InfraServ GENDORF.

Our services:

- Analytical determination of environmentally relevant waste water constituents in cooling water and wastewater
- Groundwater/ surface water studies
- Analytics of various media
- Determine environmental parameters, such as heavy metals, CSB, TOC, AOX or GC screenings
- Operate an in-house eco-toxicology lab for conducting:
 - Decomposition inhibitor tests (for testing wastewater for potential transfers to the wastewater treatment plant)
 - Zahn-Wellens tests
 - Static tests (for determining biodegradability)
 - Dynamic tests (waste water treatment plant simulation tests)
