

Future-proof plant planning & erection

PIPE ASSEMBLY AND APPARATUS FABRICATION

Pipe assembly fabrication

Our experts plan and fabricate your pipe assemblies by taking into account all requirements derived from substance properties, including the pressure and temperature of the transported media.

Pipe assemblies in process-engineering plants must comply with a wide range of requirements to safely transport media, ranging from various temperatures and pressures to specialty raw materials. We therefore supply the full range of services, from pipe bending with our in-house pipe bending and flaring machinery to corrosion protection and thermal insulation, and even including acceptance testing and non-destructive raw material testing.

Our services:

- Pipe assembly planning documentation
- Prepare drawings
- Fabricate pipe assemblies to customer specification
 - Bending DN 15 - DN 80
 - Flaring DN 40 - 150
 - Bend jacketed lines
 - Bend PTFE-clad lines
- Conduct non-destructive tests and strength tests
- Acceptance tests by TÜV or a qualified person
- Corrosion protection, thermal insulation
- Prepare documentation
