

Future-proof plant planning & erection

PIPE ASSEMBLY AND APPARATUS FABRICATION

Apparatus fabrication

Functioning and safe apparatus – which enable process engineering methods in the first place – are an integral component of process engineering plants. Our specialists plan and fabricate apparatus to your specific needs for existing plants and support your conversions of existing installations.

In addition to planning and fabricating apparatus, we leverage our expertise for the efficient and objective-driven repair of apparatus by relying on our planning and new construction experience. Corrosion protection, thermal insulation, acceptance tests, and non-destructive raw material tests round out our related range of services.

Our services:

- Apparatus planning documentation
- Prepare drawings
- Design pressure equipment and vessels
- Fabricate iaw. planning documentation, manufacture custom designs
- Testing (nondestructive testing/strength testing)
- Acceptance testing by TÜV or a qualified person
- Corrosion protection, thermal insulation
- Prepare documentation
