

Future-proof plant planning & erection

ASSEMBLY

Mechanical assembly

Our team of experts takes care of the mechanical assembly in new and existing plants. Their extensive experience related to the complex interaction between participating trades allows them to materially contribute toward the success of your construction project

Our services related to the construction and conversion of process engineering plants range from measuring the line routes to fabricating structural supports, and even include the complete assembly of equipment. Support during commissioning rounds out our range of services.

Our services:

- New plant construction related to process engineering plants
- Conversions of existing process engineering plants
- Procure the required components
- Structural support fabrication
- Measure line routes for construction on existing plants
- As-built documentation
- Commissioning support
- Heavy-duty assembly (forklifts, cranes) with our in-house staff and coordination of outside contractor deliverables
