

Future-proof plant planning & erection

ELECTRICAL ENGINEERING, MEASUREMENT AND CONTROL TECHNOLOGY, AUTOMATION

MSC engineering

Our team of experienced MSC engineers designs, plans, and implements the MSC installations for your process plants.

Field equipment is designed in close consultation with process engineers. We developed sustainable structures with sufficient reserves for infrastructure installations such as process control systems, marshalling racks, and cable conduit.

Our services:

- Design, specify, and detailed design for actuators, sensors, and the required centralized equipment for process plants
- Account for design rules for safety functions and for electrical ATEX protection
- Generate planning documentation with the CAE systems Aucoplan, Engineering Base, Eplan, WSCAD and Microstation
- Procure, apply, and provision components
- Coordinate MSC installation
