

Future-proof plant planning & erection

PROCESS ENGINEERING

Planning and layout of pipe assemblies

Our subject-matter experts specify your pipe assemblies and 3-D layout planning documentation based on functional requirements. Our sophisticated planning tools give you on demand insight into the project – with the assistance of terminal server applications.

The following services together result in complete digital detailed planning documentation that optimally supports execution at the construction site with viewer functions on digital end-user devices:

- Specify and/or generate and program the required pipe classes
- Prepare a digital intelligent R&I flowchart with all components
- Integrate into EMC planning documentation
- 3D layout planning documentation, optimized pipe assembly routing
- Pipe stress models
- Specify process engineering parameters and specify custom components
