

Sustainable growth at the chemical park GENDORF

ELECTRICITY, NATURAL GAS, AND UTILITIES SUPPLY

Utilities supply

The supply of energy and media forms the backbone for industrial production. As a competent partner, we supply you with all required media – safely, reliably, and cost-effectively.

At the chemical park GENDORF, we give you a reliable supply with media such as steam, nitrogen, oxygen, compressed air, and water in various required qualities, including cooling water. We operate our own on-site air separation plant, a water plant, and re-cooling plants – everything with the matching redundancy. As a result, we can give you the supply certainty that you need to operate your plants free of disruptions. Because we bundle the media demand for all companies represented at the chemical park, we can generate these with economies of scale that we pass on to you in the form of competitive prices.

Our services:

- Supply media such as steam, nitrogen, oxygen, compressed air
- Supply water in various qualities, and cooling water
