

Efficient plant operations & maintenance

OPTIMIZATION OF OPERATIONAL AND MAINTENANCE PROCESSES

Site development

Our specialists will develop your site concepts – for both current optimization requirements but also for purposes of strategy development. We also conduct concept studies concerning site and factory security. We help to envision the future for your site.

Overloaded traffic or dock space, inconvenient layouts of various functions at a site, additional space and infrastructure requirements due to capacity expansions or proposed site expansions: for these and many other issues, we develop concepts and planning versions, develop criteria, and assess the identified alternatives based on these. We also support you with the supplier selection and with the development of implementation plans for the selected solution.

Our services:

- Concept studies for site and factory security
 - Access control systems
 - Surveillance
- Site concepts for strategy development purposes and for optimization requirements:
 - Land concepts +D60
 - Factory relocations
 - Site review
 - Site expansion concepts
