

Efficient plant operations & maintenance

OPTIMIZATION OF OPERATIONAL AND MAINTENANCE PROCESSES

Inspection management

Our specialists analyze your plants to determine inspection requirements and to derive inspection planning documentation to ensure compliance with all legal requirements

Plant operators are required to have inspections performed in order to be compliant with all legal operator requirements. A large number of related regulations and specifications must be observed. We assist you in determining the inspection requirements, derive inspection planning documentation based on your input, and subsequently ensure that you remain current at all times.

Our services:

- Analyze existing plants and plant components
- Determine inspection requirements for each plant components on the basis of legal requirements
- Define inspection planning documentation
- Verify legal inspection requirements
- Organize inspection processing
