High-performance IT security & digital infrastructure solutions

IT CLOUD SERVICES

GENDORF Net

A highly-redundant and high-performance network is a foundation of any digitalization. We will ensure that the data reach their destination in the desired quality, so that you can focus on your core business.

We have been building IT infrastructures for our customers for more than 20 years. We see IT infrastructure as the basis of any electronic communication and data processing, be it LAN, WAN, SAN, WLAN, point-point-radio or Lora: the right network for any requirement.

Our services:

- Plan, set up, and operate IT network infrastructure
- Managed LAN, WAN, and radio infrastructure
- Lifecycle management for IT network infrastructure
