

High-performance IT security & digital infrastructure solutions

IT INFRASTRUCTURE

GENDORF Infrastructure as a Service

The use of infrastructure as a service is a reasonable alternative to acquiring and maintaining your own hardware. Avoid unnecessary costs by having the basic IT resources made available to you, while you pay only for actually used equipment.

Our services are as unique as your requirements: Standardization where it makes sense – customization where value-added can be generated for you and your business.

Our services:

- Redundant DIN/ISO-27001-certified datacenters in Bavaria
- Redundant and high-performance Internet links
- Customer networks linked by point-to-point radio
