

SAFE AND RELIABLE PROCESSES AND METHODS

Safety reports pursuant to Incident Directive

Our specialists will prepare your safety reports pursuant to Incident Directive (12th BImSchV). Safety reports are required when the quantity and type of employed substances represent an elevated hazard potential for people and the environment.

In addition to preparing the safety reports pursuant to Incident Directive, our competent subject-matter experts audit the safety reports for form, completeness, and accuracy as experts certified to Section 29b BImSchG.

Our services:

- Determine safety-relevant plant components (SRPC) and safety relevant parts of operational areas (SROA)
- Prepare and update the safety report pursuant to Incident Directive, including centralized documentation and due date tracking
- Systematic hazard analyses
- Impact assessment
- Certify general hazard protection
- Introduce concepts for plant safety and safety management systems
- Public notification mandate pursuant to Section 8 and Section 11 Incident Directive
- Technical safety consultation for permit applications
- Support for audits pursuant to Incident Directive
- Prepare audit opinion for safety reports
