SERVICES FOR BIOGAS PLANTS

Emission measurements for biogas plants

Tap into our experience from many completed measurements: Every third biogas plant operator in southern Germany relies on InfraServ GENDORF services as the notified metrology authority.

We conduct exhaust measurements pursuant to BImSchG (Bundesimmissionsschutzgesetz [Federal Pollution Control Act]) on the basis of your permit approval notice, and confirm the emission values of your biogas plant for the formaldehyde bonus pursuant to EEG (Erneuerbare-Energien-Gesetz [Renewable Energy Act]).

Our services:

- Flexible measurement schedule and fast reporting turnaround
- Assistance for meetings with regulatory officials
- Option to select between formaldehyde measurements based on laboratory methods or based on online analyzer
- Fully equipped metrology vehicles for taking non-disruptive and efficient measurements
