MEASUREMENT, TESTING, AND MONITORING OF ENVIRONMENTAL REQUIREMENTS

Emission measurements – air quality measurements

As a plant operator or as a municipal representative in charge of air quality, we are the right partner for you. We will assist you in creating transparency concerning pollution exposure in the area surrounding plants and traffic routes.

Tap into our experience from many completed emission measurements. Take advantage of the services performed by InfraServ GENDORF as the notified metrology authority pursuant to Section 29b BImSchG (Bundesimmissionsschutzgesetz [Federal Pollution Control Act]).

Our services:

- Analyze the exposure situation
- Determine baseline exposure for permit applications pursuant to BImSchG
- Measure various air constituents, such as:
 - Fine particulate dust (PM 10, PM 2,5)
 - Dust deposition (including constituents)
 - Nitrous oxide, soot, heavy metals
 - Organic substances
 - Inorganic substances
 - Dioxins, PAKs
