

Future-proof plant planning & erection

CONSTRUCTION PROJECT MANAGEMENT

Building energy certification

We prepare your building energy certifications iaw. German Energy Efficiency Directive and
DIN 18599 for nonresidential buildings.

The building energy certification is a necessary element of complete building documentation and is mandated by permitting codes. In consultation with the available energy sources, we develop and plan the best possible utility concepts based on optimized energy cost efficiencies. This planning documentation is prepared in conjunction with the building energy certification.
