

Future-proof plant planning & erection

ELECTRICAL ENGINEERING, MEASUREMENT AND CONTROL TECHNOLOGY, AUTOMATION

Network management

Is the performance of the computer networks in your plants critical for smooth operations?

Our qualified employees can support you with upfront consulting and can review your control system networks.

We define network management as the administration and monitoring of computer networks. A special role is played by the inventory of all equipment in the network, the monitoring of these components for their proper functionality, and the ongoing performance measurement of the network.

Our services:

- Review and consult concerning planning documentation, construction and operation of control system networks
- Conduct network analyses and troubleshooting
- Perform risk and security analyses for control systems
- Consult concerning performing network audits, e.g. iaw. BDEW whitepaper or ISO/IEC 27002:2005
