

Future-proof plant planning & erection

ELECTRICAL ENGINEERING, MEASUREMENT AND CONTROL TECHNOLOGY, AUTOMATION

High-voltage engineering

Our experts understand your requirements and implement these with pinpoint accuracy, whether these involve detailed tasks such as maintaining meshed network planning documentation or handling the entire project management.

Our experienced and highly-trained employees will tackle your low and medium-voltage power supply projects, thus placing your power engineering in good hands with us.

Our services:

- Prepare tenders for all power engineering services
- Procuring transformers, switchgear, power cables, and installations
- Coordinate below grade construction, cable laying, and hookup work
- Lay out and execute switchgear rooms in buildings, or as prefabricated buildings
- Erect mid-voltage installations and grids
- Maintain the meshed network planning documentation
- Project manage uninterruptible power supplies (UPS) on the basis of battery or emergency diesel plants
- Integrate and configure the control systems
