

MAINTENANCE, INSPECTION, AND TESTING

Inspection, cleaning and maintenance of waste water facilities

Our experts take over all tasks in order to ensure the safe and reliable operation of your waste water facilities in accordance with the Water Resources Act and AwSV.

Sewers are subject to an inspection and maintenance obligation within the meaning of the Water Resources Act, which is regulated in the Self-Monitoring Ordinance (EÜV). If these canals as well as other structural facilities for technical water protection are part of a facility pursuant to the AwSV, the inspection obligations are specified in the decision.

Our services:

- Cleaning and testing of structural installations for technical water protection
- Pit emptying, removal of residues
- Check oil separator according to DIN 1999-100
- Repair and new construction of sewers and shafts, in particular for chemical plants
- Various sewer rehabilitation methods
- Support in emergencies, product ingress into the soil, etc.
- Industrial civil engineering for supply and disposal lines •Auf-/Dismantling of overpumping lines
