

Efficient plant operations & maintenance

MAINTENANCE

Apparatus maintenance

Our competent subject-matter experts complete service and maintenance on apparatus and pipe assemblies. Our objective: we correct damage quickly and cost-effectively to increase your apparatus and pipe assembly uptime.

Professional maintenance on apparatus is the basis for restoring operations after a malfunction. Our pipe assembly and apparatus fabrication specialists assist you by correcting damage and by quickly restoring operations, including all required acceptance tests and documentation.

Our services:

- Troubleshoot, including damage report and photographic documentation
- Coordinate all participating trades
- Consultation by our subject-matter experts
- Planning and layout, including coordination with the designated authority
- Perform repairs pursuant to customer specification
- Prepare apparatus for re-commissioning
- Testing (nondestructive testing, strength testing)
- TÜV acceptance tests
- Corrosion protection/thermal insulation
- Prepare documentation
