

Efficient plant operations & maintenance

MAINTENANCE

Acid construction, furnace construction and linings

We plan, build, and repair your furnace brick linings, coatings, and acid liners – as new constructions and in existing equipment – by taking into account all legal requirements and miscellaneous regulations.

Our specialists take care of the planning and construction of furnace brick liners for the process industry. In doing so, we take into account operational conditions as well as process requirements. As a Ü-Chem certified contractor, we plan, build, and repair customized seals compliant with the Water Management Act – by taking into account AwSV.

Our services:

- Repairs for:
 - Acid liners
 - Furnace brick linings (reaction furnaces)
 - Coatings
