

Efficient plant operations & maintenance

OPTIMIZATION OF OPERATIONAL AND MAINTENANCE PROCESSES

Weakness analysis

Our experts determine weaknesses in the operation and in plant maintenance, and derive action plans from these that enable optimized plant operations.

Inefficiencies are identified with an objective-driven, methodical approach and are subsequently corrected with countermeasures. With your input, we document the as-is status and together with your knowledgeable staff develop optimization approaches in workshops. These initiatives form the basis for defining and putting implementation plans into action.

Our services:

- Document the as-is status for plant operations and service
- Identify actionable scope for optimization approaches
- Define improvement opportunities
- Define action plans
- Develop implementation planning documentation
- Implementation follow-up and support
