

High-performance IT security & digital infrastructure solutions

IT CLOUD SERVICES

GENDORF Cloud IoT

Everything speaks IoT - except your infrastructure? We will gladly take care of transmitting, compiling, and storing your IoT data in our ISO 270001-certified datacenters. Applications in the GENDORF Cloud.

Even for remote maintenance of plants and the control of complex logistical processes, our experts will work with you to find the matching IoT-supported solution – securely and worldwide.

We will support you with the setup and integration of systems for monitoring, visualizing, and controlling industrial plants and logistical processes. We make resources available to you in our own datacenters – flexibly, securely, and demand-driven.

Our services:

- Provision storage and backup
- Design, setup, and operate a secure IT infrastructure for data interchange
- Services for analyzing mass data on the basis of Hadoop
- Secure IoT infrastructures
- Integrate IoT infrastructures
