

SECURE BUILDINGS AND PROPERTIES

AwSV plants

In order to mitigate the risk presented by handling water hazardous substances, our experts will advise you regarding the implementation of the requirements in AwSV (Verordnung über Anlagen zum Umgang mit wassergefährdenden Stoffen [Directive on Plants Handling Water Hazardous Substances]). Preparing corresponding expert appraisals is also part of our range of services.

The protection of water resources must be ensured, regardless of whether you operate a warehouse with hazardous materials or heating oil, a fueling station, or a chemical plant. In order to mitigate the risk presented by handling water hazardous substances, the AwSV (Verordnung über Anlagen zum Umgang mit wassergefährdenden Stoffen [Directive on Plants Handling Water Hazardous Substances]) imposes a wide range of requirements on plant operators. We assist you to maintain compliance with AwSV.

Our services:

- Consult on the use of all water protection-relevant regulations for proposed plants or for changes, expansions, and decommissioning of existing plants
- Consult on use of the new AwSV for implementing organizational and physical requirements
- Support for, or execute statutory water declarations and permit applications (e.g. findings of suitability)
- Review and prepare expert appraisals by our in-house organization of AwSV experts
- Classify substances into water hazard classes (WHKs)
- Prepare and maintain an AwSV plant structure
- Consult on physical requirements (e.g. collection basins, site layout)
