SERVICES FOR BIOGAS PLANTS

Fire protection for biogas plants

In order to prevent the inception, spread, and impact of fires, we comprehensively take care of fire protection in the buildings of your biogas plant.

Preventive fire protection comprises all precautionary measures that prevent and/or mitigate the inception, spread, and impact of fires, and is the prerequisite for effective fire prevention and fighting. Our tasks include technical fire protection planning and preparing fire protection concepts, fire protection certifications, emergency exit and rescue route planning documentation, fire protection planning documentation, and fire department deployment planning documentation.

Our services:

- Prepare expert appraisals and position statements pursuant to Bavarian Construction Code (Bayerische Bauordnung) in accordance with Section 14 Construction Submittal Directive [Bauvorlage-Verordnung] for special-purpose buildings
- Technical fire protection consulting for new construction, remodeling, and renovations
- Concepts for extinguishing water supply and disposal
- Prepare end-to-end fire protection concepts
- Consulting on special fire protection matters
- Conceptual design of building fire protection installations
- Prepare and maintain fire protection policies, fire department deployment planning documentation, and abbreviated deployment instructions
- Emergency exit and rescue plans (DIN 4844-3, BGV A8, Section 55 ArbStVO)
- Determine fire load
- Plan and conduct fire protection and safety audits
- Perform the function of the fire protection representative
