

Forward-looking environmental services & analytics

MEASUREMENT, TESTING, AND MONITORING OF ENVIRONMENTAL REQUIREMENTS

Mineral oil lab

Companies expend significant management effort and high costs operating a highly-specialized lab – in particular when faced with persistently escalating statutory requirements. The mineral oil lab operated by InfraServ GENDORF offers a broad spectrum of services related to analyzing mineral oil products.

On your behalf, we take care of the analytics for raw materials, petrochemical intermediate and end products, and for gas samples. We analyze your samples pursuant to international standards.

Our services:

- Analyze products pursuant to international standards, e.g.:
 - Diesel fuel iaw. DIN EN 590
 - Heating oil iaw. DIN 51603-1, JET A-1 in compliance with AFQRJOS (JIG standards)
 - Calcined petroleum coke (various standards)
- Analyze the raw materials (crude oil, FAME, additives, etc.)
- Analyze petrochemical intermediate and products (gas oil, heating oil, diesel, calcined petroleum coke, benzene, JET)
- Analyze gas samples (such as ethylene, propylene)
