ENVIRONMENTAL MANAGEMENT

Management systems

Management systems for quality, environment, health and safety pursuant to international standards give you the ability to optimize your production and order management processes and strengthen the long-term legal certainty of your business.

You are in the right hands with us if you wish to ensure that your business is permanently adaptable to market trends and other changes of significant framework conditions. We advise you on integrated and process-oriented management systems and take care of building and maintaining selected management systems on your behalf, thus supporting the profitability and future viability of your business.

Our services:

- Review the ingoing position and the cost/benefit of optional systems
- Participate in the optimization of control and monitoring processes within the company (assurance and corporate governance)
- Hands-on support for the various implementation phases, up to and including certification
- End-to-end adjustments to existing systems to promote acceptance and to adapt to changing internal and market-driven requirements
- Support for preparing the handbook and the documentation
- Prepare environmental declarations iaw. EMAS
